TECHNICAL SHEET

AMANITA MUSCARIA POWDER

Product Name	Amanita muscaria Powder
Commercial name	Amanita muscaria Ground – Grade A
Botanical name	Amanita muscaria
Description	Premium-grade powder made from carefully selected, dried Amanita muscaria caps. Grade A refers to the highest quality grade of the ground fruiting bodies supplied for this product.
Part used	Caps
Form	Ground powder
Grade	Grade A – premium quality
Origin	Carpathian region, Ukraine
Harvest	August–September 2025
Drying process	Dried in a drying chamber at 45–50 °C

TECHNICAL SPECIFICATIONS

Raw material	100% dried Amanita muscaria caps
Processing	Dried and subsequently ground into powder
Active compounds	Naturally occurring ibotenic acid and muscimol
Organoleptic characteristics	Texture: powder
Additives	None added
Supplier packaging	ZIP bags
Storage	Store according to the storage conditions specified by the supplier; keep dry and protected from direct sunlight.
Shelf life	Not specified in the supplier information reviewed
Certification	Supplier states ISO 22000:2019 and HACCP certification

Supplier information

The supplier states that its dried Fly Agaric is harvested in the Carpathians, Ukraine, and dried in a chamber at 45–50 °C. The supplier also states that its production is certified according to ISO 22000:2019 and HACCP standards.
Important: Amanita muscaria naturally contains the psychoactive compounds ibotenic acid and muscimol. No quantitative assay value for these compounds was stated in the supplier information reviewed. This technical sheet describes the raw material and does not constitute medical advice.
